

I am an Indiana resident, and I would like to speak against proceeding 02-278, a petition from the Consumer Banker's Association to lift restrictions of Indiana's Do Not Call List. In my opinion, this law is one of the best things Indiana government has done. I see no reason why telemarketing laws should be uniform across all states; we have a federal system because we acknowledge the benefits of allowing states to set their own laws. Please protect my right to choose not to receive calls from telemarketers and deny this petition.
